## Is new energy storage reliable

#### Why do we need energy storage?

Low-cost renewable electricity is spreading and there is a growing urgency to boost power system resilience and enhance digitalization. This requires stockpiling renewable energy on a massive scale, notably in developing countries, which makes energy storage fundamental.

### What is the future of energy storage?

"The Future of Energy Storage," a new multidisciplinary report from the MIT Energy Initiative (MITEI), urges government investment in sophisticated analytical tools for planning, operation, and regulation of electricity systems in order to deploy and use storage efficiently.

### Can low-cost long-duration energy storage make a big impact?

Exploring different scenarios and variables in the storage design space, researchers find the parameter combinations for innovative, low-cost long-duration energy storage to potentially make a large impactin a more affordable and reliable energy transition.

Should energy storage be co-optimized?

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

Should energy storage systems be mainstreamed in the developing world?

Making energy storage systems mainstream in the developing world will be a game changer. Deploying battery energy storage systems will provide more comprehensive access to electricity while enabling much greater use of renewable energy, ultimately helping the world meet its Net Zero decarbonization targets.

### Is battery energy storage a new phenomenon?

Against the backdrop of swift and significant cost reductions, the use of battery energy storage in power systems is increasing. Not that energy storage is a new phenomenon: pumped hydro-storage has seen widespread deployment for decades. There is, however, no doubt we are entering a new phase full of potential and opportunities.
