

# Is there solar power nearby

How many states have community solar?

As of 2024, community solar programs of some sort are available in 41 states and Washington, D.C. However, availability still requires participation from individual local utilities in many cases. Can you make money with community solar?

Where is solar for all available?

These new Solar for All providers will be operating in all 50 states, D.C., Puerto Rico and Guam. Keep an eye on the development of these programs: If you're eligible to apply to them, you'll want to get in on them as soon as possible to maximize your savings.

Are there any states without community solar laws?

Most states without community solar laws in place have at least seen some sort of legislation introduced in their statehouses. Community solar bills have been introduced in Michigan, Wisconsin, Pennsylvania and Montana in recent years.

How many community solar projects are there in 2024?

The Solar Energy Industries Association estimates 6.5 gigawatts of community solar have been installed in the US as of the first quarter of 2024. These projects are spread across 41 states and Washington, DC, with 19 states and DC implementing official policies and programs to encourage more community solar.

Should you choose a local or national solar installer?

If you choose an installer based near you, you can receive more dedicated attention because local companies don't have as many customers to worry about. Similarly, local installers rely heavily on satisfied customers to refer their friends and family, while national solar companies have a bigger budget for sales teams and marketing budgets.

How does solar for all work?

Solar for All is circumventing that altogether by setting aside funding for low-income households to get that solar energy generation free of charge. Not every Solar for All program offers both community solar and free rooftop solar. One of the biggest state-level programs already operating in New York only supports community solar, for example.
