Several factors have contributed to the fact that no nuclear power plants have been built in Israel over the years. One is the fact that the Israel is not a signatory to the Treaty on the Non-Proliferation of Nuclear Weapons, which makes it more difficult for the country to engage with international suppliers of nuclear technology. Another reason is that very large deposits of ...

The Megalim solar thermal power plant, a joint venture of BrightSource, GE Renewable Energy and the Noy Fund, said on 10 April, that it has begun commercial operation in Israel. The Ashalim Solar Thermal Power Station, located in Israel's Negev desert, is one of the largest projects of its type in the world. It is also the first solar thermal ...

Israel endorsed a target of generating 10% of the country's electricity from renewable sources in 2020. Solar thermal and photovoltaic power plants are expected to account for over 70% of total generation, with the remainder deriving from household PV uni

Israel opened up a war on three fronts with major airstrikes on Houthi-controlled parts of Yemen on Sunday. Huge explosions rocked the Red Sea state as Israel took revenge for missile attacks launched by the Iran-backed group. "The explosions shook the city," said reports from Hodeidah, with social media posts showing major blasts and what appeared to be ...
