

Israel solar packages with payment plan

Why is Israel introducing a solar PV tariff?

The Electricity Authority of Israel has introduced a tariff for solar PV systems that are distributed and use energy storage in order to manage grid demand. The country aims to reach 30% renewable energy in the network by 2030 but struggled to meet its previous 10% target by 2020.

What is the Ashdod solar pay small scheme?

The Ashdod Solar Pay Small Scheme removes the barrier of non-affordable Solar and Inverter Systems for qualified individuals and/or businesses through the introduction of up to 1 year payment plan for Solar and Inverter solutions designed to create easier and effective access to clean and reliable energy with quality products/services.

How many renewables are installed in Israel?

Similarly, more than 90% of about 6 GW of renewables installed today in Israel are PV systems. Israel's wind energy resources are less strong, resulting in fewer wind power installations.

Does Israel need more green energy?

Renewable energy covered 12.5% of Israel's electricity demand last year, up from 10.1% in 2022. Given the country's steady increase of annual electricity demand and in order to maintain these rates, Israel needs to continue to add significant amounts of green power, said the Electricity Authority.

How does a solar installation plan work?

With a minimum down payment of 30% of the installation plan cost, the balance payment is spread on tenor up to 1 year with monthly interest range of 1.6% to 2% on the financed sum, the Solar or Inverter system is installed. All products in the installed plan enjoy manufacturers' warranty of between 1 - 25 years.

Why is electricity demand rising in Israel?

The Electricity Authority has also noted that the increase in electricity demand in Israel is higher than other Western countries due to reasons such as the rising population and relatively high economic growth. Renewable energy covered 12.5% of Israel's electricity demand last year, up from 10.1% in 2022.

I'm wanting to install solar, but don't have the capital right now. I have an offer from Origin Energy for a 10.14kW system with 8.2kW Fronius inverter for roughly \$11,900 installed (after STC deduction). They offer two payment options, outright purchase or a solar payback plan with \$0 up-front and no interest. So the \$11,900 over 60 months.
