

It is illegal to build solar power yourself

Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Do solar panels need planning permission?

Typically, solar panel installations in the UK are considered "permitted developments" and do not require planning permission, as long as they meet certain conditions. However, permissions are necessary if the building is listed or in a conservation area. What is MCS certification and why is it important for solar panel installation?

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Are solar panels legal in the UK?

All electrical work in the UK must comply with the national standard, BS 7671. Therefore, it's not just about the legality but also the safety and reliability of your solar panel system. While the Feed-in Tariff (FIT) scheme has concluded for new applicants, those already part of it continue to benefit from the incentive.

When did solar panels become a building regulation?

In 2005, household electrical work was absorbed into the UK government's official Building Regulations. A year later, the Climate Change and Sustainable Energy Act 2006 brought microgeneration systems like solar panels under the umbrella of the Building Regulations. Should you receive a building regulations certificate for your solar panels?
