

# Italy zeta energy ltd

What is Zeta Energy?

Zeta Energy is a US-based privately-held company focused on developing and commercializing high performance, safe, rechargeable batteries. It has filed more than thirty patents on its proprietary carbon nanotube anode and sulfur cathode technology. Zeta Energy is a US-based company specializing in battery development and commercialization.

Does Zeta energy use cobalt?

Zeta Energy's lithium-sulfur battery technology has been rigorously tested and has shown consistently better performance than existing lithium ion batteries. Even more importantly, Zeta Energy's lithium-sulfur batteries use no cobalt, nickel, manganese or graphite.

What is a Zeta cathode?

Zeta's cathode is based on a sulfurized carbon material that offers high stability and superior sulfur content, outperforming current metal-based cathode materials. Zeta Energy lithium-sulfur batteries are sustainably sourced and produced. Zeta Energy's raw materials and production processes give it one of the industry's lowest carbon footprints.

Do Zeta batteries use cobalt?

Even more importantly, Zeta Energy's lithium-sulfur batteries use no cobalt, nickel, manganese or graphite. They are based on lithium, carbon and sulfur, which are all widely abundant and economical.

What are Zeta energy sulfur-based cathodes?

Zeta Energy sulfur-based cathodes are inherently inexpensive, have effective cost-per-energy, use no cobalt, graphite, nickel or metal, reducing cost volatility and dependency on foreign nations.

How many patents does Zeta have?

Zeta has filed more than sixty patents on its proprietary anode and cathode technology. Zeta's management team collectively has more than 100 years of experience in developing and commercializing new technology. 25+ years building companies. Last start-up earned stakeholders over \$100m in a 5-year period.
