

Ivory Coast energy hub kft

Will Ivory Coast achieve universal energy access by 2025?

Ivory Coast plans to achieve universal energy access by 2025, with demand expected to grow by more than 1,000 MW to 2,430 MW in the same year. As of 2021, Ivory Coast had an installed capacity of 2,269 MW, with roughly 61% (1,390 MW) generated by thermal power and the remaining 39% (879 MW) generated by hydroelectric dams.

How much energy does Ivory Coast produce?

Energy in Ivory Coast has a capacity of 2,200 megawatts (MW) energy production. Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali.

Does Ivory Coast have a reliable power supply?

Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali. Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%.

Will Ivory Coast achieve 400 MW solar power by 2030?

Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%. Ivory Coast aims to reach 400 MW in generating capacity from solar power by 2030. The country is building the Boundiali Solar Power Station, which will have a capacity of 37.5 megawatt-peak (MWp).

Will Ivory Coast develop a solar project with Emirati companies?

To date, Ivory Coast has inked agreements to develop two solar projects with the Emirati businesses Masdar and Amea Power, with capacities of 70 MW and 87 MW, respectively.

Does Ivory Coast use natural gas?

The AZITO power station, built in 1999 and supplying one-third of the country's energy, uses natural gas produced off the coast of Ivory Coast. In 23 years, the project's capacity has grown nearly fivefold. After investing in new steam turbines in 2013, Ivory Coast became the first African country to use the combined-cycle system.

Ivory Coast's Ministry of Mines, Petroleum and Energy signed production sharing agreements for four offshore oil blocks with Eni in August this year. Under the agreements, Eni will invest over \$80 million in exploration activities across Blocks CI-504, CI-526, CI-706 and CI-708 over a three-year period.

Ivory Coast's efforts to position itself as a regional oil and gas hub extend beyond production. The Ministry has identified 26 blocks available for leasing and is accelerating certification of reserves in existing blocks.

Experts warn against resource over-dependence and environmental risks, as Côte d'Ivoire faces deforestation and pollution challenges linked to its growing energy and mining sectors. Côte d'Ivoire's economy, once rooted in agriculture, now shifts due to significant oil and gas discoveries.

Ivory Coast's Council of Ministers has approved production-sharing agreements with Eni for four oil blocks. Under the deal, a minimum of \$80 million will be invested in blocks CI-504, CI-526, CI-706, and CI-708 over an initial three-year exploration period, the council said in a statement. The world's top cocoa-producing nation...
