

Ivory Coast renewable energy solutions

What is EDF doing to support Ivory Coast's energy transition?

Renewable energy and... As part of its active involvement in supporting Ivory Coast's commitment to the energy transition, EDF is developing an innovative biomass power plant project in partnership with local energy players. Ivory Coast is aiming for an energy mix in which 42% will come from renewable energy by 2030.

How many solar plants will Ivory Coast have by 2040?

Mamadou Sangafo Coulibaly, the Ivory Coast's Minister of Mines, Oil and Energy, has announced plans to install 678 MW of solar capacity by 2030 and 1,686 MW by 2040. According to the government's website, there are plans for 12 new solar plants with a combined capacity of 628 MWp.

Why did EDF sign a concession contract with the Ivorian government?

To help it achieve this goal, EDF signed a concession contract with the Ivorian government in December 2019 via BIOVEA Energie (owned with its partners Meridiam and Biokala, a subsidiary of the SIFCA group). This contract involves the design, financing, construction and operation of a 46 MW biomass power plant over 25 years.

On this platform you can find many early-stage, home-grown and often open-source grassroots solutions developed by people who are innovating in the margins to solve complex development challenges faced by their communities.
