Could a solar farm boost Jersey's energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say.

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

Will a ground-based solar installation at Mont Fondon increase Jersey's energy security?

Jersey Electricity (JE) is inviting St Peter parishioners to attend a consultation for a ground-based solar installation at Mont Fondon. Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security".

Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

Will Jersey's 'island plan' boost energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". The firm said the proposal - which is one of several sites it hopes to build by 2026 - supported the government's Island Plan and energy policy.
