

Who are Jersey Energy?

Jersey Energy are specialists in energy auditing and surveying. They are also experts in commercial strategies towards energy efficiency and the only certified BREEAM assessors within the Channel Islands. They offer low energy, efficient, and cost-effective solutions tailored to your requirements. Jersey Energy is not Jersey Gas.

Why is Texel a strategic investment for the future?

This establishes TEXEL's solution as a strategic investment for the future, moving beyond traditional costs and the perpetual demand for supply. TEXEL has established itself as a global frontrunner in the realm of Stirling technology. Renowned for its scalability, this technology adeptly converts heat into electricity with high energy efficiency.

Does Jersey electricity want to protect green space?

Steve Tanner, head of capital delivery for Jersey Electricity (JE), said the company wanted to "protect green space on the island" and "the total of all six sites is only 0.8% of the total agricultural land available". Ms Layzell said: "These fields in St Mary are in the top 50% of land for Jersey Royals.

Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

Na een carrière in de spoorwereld van 44 jaren ben ik vanaf 1 december 2024 met pensioen. Maar ik wil zeker niet stil zitten. Daarom zit ik nu met veel plezier in het bestuur van Texel ...

On May 30, 2024, Texel Energy Storage filed a patent that presents a novel device for storing electric energy through innovative hydrogen-related technology. The patent, filed by Texel Energy Storage, details a sophisticated energy storage device comprising a heat reaction chamber, an energy storage unit, and a heat exchanger.

STOCKHOLM, Feb. 2, 2022 /PRNewswire/ -- Cost-effective and circular energy storage is needed to utilize renewable energy and move away from fossil fuels. Markets like California have reached the end of the road; it is not possible to add more wind and solar power to California without adding an energy storage solution. TEXEL and the Port of Los Angeles based ...

TEXEL Energy is further investing in Jord AB, and simultaneously, the companies have signed an agreement to adapt TEXEL's energy production technology to generate electricity from Jord's pellets and briquettes, made from C4 grass. Jord's ambition is to cultivate the world's fastest-growing biomass (C4 grass) at various

locations around the globe ...

The acquisition is in line with TEXEL's ambition to remain at the forefront of thermal energy conversion technology, which encompasses stored heat-to-electricity systems and waste thermal energy-to-electricity ...

1     ; Concerns have been raised over plans to build six solar farms across Jersey. ... Another proposed site in St Mary has left resident Laura Layzell, who says she is pro-renewable energy, fearing ...

TEXEL intends to manufacture the technology in the U.S.," says Lars Jacobsson, founder, and CEO of Swedish cleantech company Texel Energy Storage. TEXEL metal hydride thermochemical energy storage technology provides an emerging solution that can store energy and provide both electrical and thermal output. Furthermore, the TEXEL storage ...

We work with innovative companies at any technology readiness level. Engaging with clients and governments to manage all aspects of energy transition from improving efficiencies to base ...

TEXEL Energy Storage, a Swedish energy storage startup founded in 2018, develops a simple, cheap thermochemical battery that can store electricity from renewable sources like solar cells and wind turbines. The battery is charged with renewable electricity by heating limestone (CaCO_3), which breaks down into CO_2 gas and calcium oxide (CaO).
