

Jersey upgrading solar system

Will a ground-mount solar panel installation reduce energy prices in Jersey?

Jersey predominantly relies on energy imported from neighbouring France. Credit: ITV Channel Jersey Electricity's (JE) CEO says a ground-mount solar panel installation on the island will help reduce energy prices in the long term.

Does Jersey have solar panels?

JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island. Earlier this week, JE increased islanders' electricity tariff by 7.5% from January 2025, adding around £2 extra per week to the average household bill.

What do people in Jersey think about solar farms?

Jersey Electricity (JE) is asking people in St Mary what they think about proposals for two solar farms. The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said.

Will Jersey be able to produce solar energy in the winter?

Mr Ambler added that while Jersey sees enough sunshine in the summer to produce solar energy, the island will still need to be connected to the wider grid in the winter when daylight hours are significantly reduced. Want a quick and expert briefing on the biggest news stories? Listen to our latest podcasts to find out What You Need To Know...

Will JE bring roof-based solar on the grid?

JE has so far focused on bringing roof-based solar on to the grid with four installations on its Power Station, Queen's Road Solar Hub, Jersey Dairy and Woodside Farm, currently generating around one million kWh (units) a year. A planned fifth array on the roof of the
