

Jordan microera power

In the face of the climate change crisis, MicroEra Power is supporting sustainability with THERMAplus(TM), an on-site thermal energy storage solution to provide commercial buildings with resilient, low-cost, low-carbon Heating and Cooling. Building owners save up to 50% on heating and cooling costs! Peak load management supports the transition ...

MicroEra Power has been actively engaged with multiple utility companies throughout Vermont through introduction from the DeltaClimaVT accelerator program. In providing low cost, low carbon, adaptive thermal energy storage to commercial buildings, THERMAplus provides value to both commercial buildings and utility providers. ...

MicroEra Power is developing THERMAplus(TM), an on-site thermal energy storage system to decarbonize heating and cooling commercial buildings and campus/district energy systems while optimizing for cost and resiliency.

MicroEra Power is developing THERMAplus to decarbonize heating and cooling and to provide commercial buildings, district heating, and geothermal developments with flexible thermal energy storage. Increase HVAC system efficiency by 20% and use the load-shifting capabilities to reduce energy costs by up to 50%. We are working with support from ...

MicroEra Power is developing THERMAplus(TM), a four-season on-site thermal energy storage solution which enhances Heating, Ventilation and Air Conditioning (HVAC) systems, to empower commercial building managers with tools to control heating and cooling loads and costs.

This EPRI-IEL project demonstrates MicroEra Power's THERMAplus system's ability to store heat and cooling using one tunable system, conditioned for thermal discharge at temperatures optimized for efficient heating and cooling of commercial

MicroEra Power is excited to announce we were accepted into Greentown Labs climatetech startup incubator in North America. Greentown Labs aims to be the leading hub for people working towards the shared goal of a sustainable and renewable future through fostering a community committed to solving the climate crisis through entrepreneurship and collaboration.

MicroEra Power, Inc. | 1,095 followers on LinkedIn. Innovating on-site Thermal Energy Storage for sustainable low-cost, low-carbon heating and cooling for C& I buildings. | MicroEra Power is developing THERMAplus, a Thermal Energy Storage system with smart software and Phase Change Materials to provide low-cost and low-carbon Heating and Cooling for commercial ...

Jordan microera power

Highlights from DeltaClimaVT. The DeltaClimaVT business accelerator is a Vermont-based program serving startup and seed-stage ventures focusing on energy and climate economy innovation across multiple industries. MicroEra Power was selected in March, 2022, to participate in the elite program. DeltaClimaVT 2022 Cohort 6 featured 7 US and Canadian ...

MicroEra Power has developed unique, tunable Thermal Energy Storage systems to make building heating and cooling loads flexible - providing an efficient, compact, affordable LDES solution for building, campus, and district energy applications.

Ellie Rusling is co-founder and CEO of MicroEra Power, Inc., based in Rochester, NY. An inspired entrepreneur, Ellie understands the global need for robust energy infrastructure and resources. Her ...

MicroEra Power has been selected from an applicant pool of nearly 800 companies to the Top 50 of QBE AcceliCITY's Resilience Solutions. QBE AcceliCity focuses on the demonstration & commercialization of technologies that support the decarbonization of cities. They connect innovators with city, county and state governments.

To reduce demand charges, improve efficiency and decarbonize buildings, energy storage is needed. MicroEra Power is commercializing THERMAplus(TM) - a unique thermal energy storage solution which manages a building's heating and cooling system to reduce the peak electrical loads of the building.

MicroEra Power, Inc. is thrilled to announce we have been selected by EPRI for the prestigious Incubatenergy Labs Challenge 2023! We are honored to have been chosen to demonstrate our groundbreaking THERMAplus technology to decarbonize heating and cooling for commercial buildings while optimizing for resiliency and cost. The project is funded ...

The energy landscape is changing rapidly and innovation plays an important role. MicroEra Power is positioning to pilot a thermal energy storage solution for low-carbon and low-cost heating and cooling for commercial buildings. Seeking intelligent, capable people to join the team as we prepare to pilot, demonstrate, and launch into the marketplace!
