Commenting on the news, TRAC Renewables F4OR Programme Manager Kenny Wiggins said: "Back in 2021, TRAC Energy defined the offshore renewable energy sector as a major strategic priority, with a strong combination of political, environmental and economic factors indicating the start of a new phase of maturity in the sector. F4OR was highly ...

The share of green electricity in Jordan rose to over 13% in 2019 from 0.7% in 2014, shows data by the International Renewable Energy Agency (IRENA). The expansion was supported by adequate policies and regulations that promote renewables, including solar photovoltaic (PV) and onshore wind development. You can subscribe to our M& A newsletter here

Jordan is orchestrating a paradigm shift in its national energy strategy, according to recent reports and expert opinion, positioning itself as a beacon of progress in the realm of renewable energy.

Overview. Jordan is one of the leading countries in the region in renewable energy (RE) adoption and clean energy growth. Solar or wind energy powers approximately 29 percent of the electricity grid and Jordan aims to reach 50 percent of electricity from renewables by 2030 through a focus on smart grid development and energy storage projects.

Jordan's experience creating this new market offers a roadmap for other countries. Energy from wind and solar covers nearly one-third of Jordan's electricity needs--a significant jump from 10 years ago, when no renewable ...
