

The project is envisaged to be implemented in phases. The start of construction is scheduled for 2025. Upon completion and commissioning, which is expected at the end of 2026, Montechevo will be the largest solar power plant in Montenegro. This year Montenegro has issued initial clearance for a solar power plant of up to 506 MW

RES Montenegro Group received the urban planning and technical requirements for a photovoltaic facility with a connection capacity of up to 506 MW. The project in Cetinje is the biggest in Montenegro and one of the largest ones in Southeastern Europe. The company Montenegro Investment and Holdings achieved the same milestone for a 12.5 MW facility.

In 2014 we released the original K series Miata engine conversion. At the time, we didn't expect to shake up the industry as much as we did. But now just a few years later, K powered Miatas are dominating in club racing all across the globe. Simultaneously, hundreds of other customers are enjoying fast, well-sorted, an

Montenegro: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. ... Nuclear power - alongside renewables - is a low-carbon source of electricity. For a number of countries, it makes up a large share of electricity production.
