Leading intelligent energy software platform, Kaluza, and AGL Energy [ASX:AGL], one of Australia's largest energy retailers and generators, today announce the successful migration of OVO Energy Australia customers to the Kaluza platform. The migration marks an important step in Kaluza's expansion to Australia and is a pivotal step towards ...

AGL chief customer officer Jo Egan said, "AGL is pleased to have completed the localisation of the market-leading Kaluza platform for the OVO Energy Australian customer base. Through our joint venture, AGL and OVO are bringing world-class technology and innovation to Australia, ensuring customers have choice and flexibility when it comes to ...

Providing energy for Vatican City State. The agrivoltaic plant will make use of the Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican Radio, thanks to a 1951 agreement between the Holy See and the Italian State. The new plant is intended to supply ...

OVO and energy software business, Kaluza, today announce partnering with Volvo Cars to develop electric vehicle (EV) managed charging solutions to Volvo Cars and OVO customers in the UK. The solutions will include one-way smart charging and bi-directional charging, with both due to launch in 2024. The new Volvo EX90 all-electric SUV will also ...

Tom is one of those, like me, that tried to bring business acumen to a very nascent, and very hippy, clean and renewable energy sector in the UK in the late 2000's. His journey, passion and drivers are fascinating to share, as is the story of Kaluza, a company really creating the Internet of Energy (IoE), across a range of domestic devices, proving new ...
