

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

What is the main energy publication of the Republic of Kazakhstan?

The main energy publication is the annual Fuel and Energy Balance of the Republic of Kazakhstan. It contains annual data on energy supply and demand in physical and energy units with sectoral breakdowns, as well as energy intensity indicators.

Is Kazakhstan a major energy exporter?

Kazakhstan is also a major energy exporter. In 2018, it was the world's 9th-largest exporter of coal, 9th of crude oil and 12th of natural gas. In 2018, Kazakhstan's energy consumption (measured by total primary energy supply) was 76 Mtoe, comparable to consumption in the Netherlands (73 Mtoe).

How much oil does Kazakhstan produce?

It produces more than twice as much crude oil as Azerbaijan but around half the natural gas produced in Turkmenistan. Kazakhstan's total energy production (178 million tonnes of oil equivalent [Mtoe] in 2018) covers more than twice its energy demand. Kazakhstan is also a major energy exporter.

Will Kazakhstan's Energy Transition be a model for other countries?

Kazakhstan's progress on the energy transition can serve as a model for other countries in the region and beyond on advancing a just transition away from fossil fuels—helping to build a more sustainable, resilient economy for all.

Does Kazakhstan need more energy?

As Kazakhstan expands renewables, more investment will be needed in flexible capacity such as gas-fired and hydro power plants to accommodate the variability of solar and wind output, the report says. Kazakhstan's system currently relies significantly on electricity imports from Russia to cover imbalances and maintain frequency stability.
