

What is Kazakhstan's new project with Svevind Energy Group?

The new project between Kazakhstan and Svevind Energy Group establishes a long-term commitment and framework which creates an avenue for a definition on land access, permission processes, taxes, and no restrictions on trade and capital movements, according to Rene Pforte, Chief Business Development officer at Svevind.

Is Svevind energy a world's largest wind farm?

Svevind Energy Group, the company behind Europe's largest wind farm in Sweden, signed an agreement with Kazakhstan's government to build a 20 gigawatt green hydrogen plant that is expected to be one of the world's largest, the company said on Thursday.

Could Kazakhstan be a reliable supplier of green energy?

ASTANA - Svevind, the company behind Europe's largest wind farm in Sweden, is running a green hydrogen project in the Mangystau Region, seeking to establish Kazakhstan as a reliable supplier of green energy in the form of hydrogen and ammonia for the global markets, said the company's CEO Wolfgang Kropp in an interview with The Astana Times.

Who is Svevind Energy Group?

SVEVIND Energy Group announces today that it has completed a transaction with the leading Norwegian utility Statkraft. Our Swedish subsidiary SVEVIND Nordic AB, the successor to SVEVIND AB, is now officially part of Statkraft. The... The first week of October 2022 marked an important milestone in the history of Svevind's "Project Sandbacka".

How much does Svevind Energy Group invest in a green hydrogen hub?

Svevind Energy Group's Chief Executive Officer Wolfgang Kropp and Kazakhstan's First Deputy Prime Minister Roman Sklyar signed an investment agreement for the construction of a green hydrogen production and distribution hub in the Mangystau Region worth \$50 billion, President Kassym-Jomart Tokayev's office announced on October 27 in Astana.

What is Svevind doing in Sweden?

In northern Sweden, SVEVIND is currently developing Europe's largest onshore wind farm in the MARKBYGDEN 1101 project: it is scheduled for completion in 2026 and will have a capacity of 3.4 gigawatts. This will meet about 8 per cent of Sweden's electricity needs and will replace power generation from aging nuclear power plants there.

A large number of appointments, meetings and events were on the agenda when a team from the SVEVIND Energy Group in Germany recently paid a visit to Aktau. The team from management, project ...

During the meeting with the management of Svevind Energy Group, the issues of preparation for the implementation of the project for the production of "green" hydrogen in the Mangistau region were discussed. ... -FEED under the Investment Agreement signed during the visit of the President of the European Council Charles Michel to Kazakhstan last ...

"The green hydrogen facilities will lift Kazakhstan among the global leaders of renewable energy and hydrogen at very competitive, ultra-low production costs. We trust that for green hydrogen, Kazakhstan is the place to be," said SVEVIND's majority owner and CEO Mr. Wolfgang Kropp in a statement.

Hyrasia One, a project by European SVEVIND Energy Group, is one of the world's largest projects under development to produce green hydrogen in Kazakhstan. Hyrasia One is creating a wind-solar-hydrogen plant in Central Asia that will produce up to 2 million tons of green hydrogen or 11 million tons of green ammonia per year.

President of Kazakhstan, Kassym-Jomart Tokayev, held discussions with the leadership of the German company Svevind Energy Group, marking a crucial step toward the initiation of a groundbreaking project for the production of "green" hydrogen within the republic.
