Is Kinetik a good company?

Kinetik has been able to provide us with good value for money, a dedicated account manager and team that are both very knowledgeable in the areas of expertise we need. We were able to place one of the shortlisted candidates within two months, which is very fast for a senior role.

At Energy Floors, we are on a mission to engage the public in positive environmental activity by raising awareness about the global energy transition. That being, the necessary shift away from fossil fuels and other harmful processes that have damaged the planet. We do this through our kinetic floor which offers a sustainable solution; a source of human-powered energy.

Based on current studies conducted by the Energy Sustainable Focus Group in Malaysia, the electricity demand per capita is forecasted to reach 7571 kWh/person in 2030, which is more than double the demand in 2002 (Ali et al., 2012, Petinrin and Shaaban, 2015). This strong demand is heavily influenced by the industrial and residential sectors, as Malaysia is ...

Malaysia, with a latitude of 4.21° N, is located near the equator in Southeast Asia and separated by the South China Sea into two distinct parts- Peninsular Malaysia and East Malaysia (Fig. 9). The Peninsular region consists of 11 states while the two major states of Sabah and Sarawak form the Eastern region.

Access to electricity is crucial for the socio-economic development of a society at various scales (e.g., at community or national levels). At present, coal, natural gas, petroleum and other liquid fuels are the primary energy sources for the world's electricity production due to its low cost and high availability [1], [2]. Unfortunately, energy productions using fossil fuels are ...
