Web oficial de Ampere. Como funcionam. As baterias inteligentes armazenam a energia excedente gerada pelos painéis solares durante o dia, para que possa utilizá-la 24 horas por dia. Através do nosso software específico equipado com inteligência artificial, são capazes de auto-gerir, prever a produção solar, analisar os preços do mercado de electricidade e os padrões ...

Portugal is solidifying its position as a European leader in renewable energy, making significant strides toward a greener future. In 2023, renewable sources accounted for 61% of the country's electricity consumption, a remarkable achievement driven by favorable weather conditions, technological advancements, and heavy investments in wind, water, solar, and ...

6 likes, 2 comments - phil_allanson_photo on October 16, 2024: "Kiri and I had an absolute blast during our recent 70s retro-themed photoshoot! Her vibrant energy and playful personality made the session so much fun, and she effortlessly rocked that vintage vibe. Kiri brought the groovy era to life with style and grace, from her foxy afro to her impeccable outfit. ...

In 2013, 25.7% of the energy in Portugal was renewable, increasing to 27% in 2014 and 28% in 2016. By 2020, this number increased to around 30%. Portugal made worldwide news when in February 2016, 95% of the electricity produced in Portugal was sourced from renewable energy, including biomass, hydropower, wind power, and solar power. ...

While Portugal thrives, the International Energy Agency (IEA) warns that the global target set during COP28 to triple renewable energy capacity by 2030 may be in jeopardy. The IEA's latest report suggests that worldwide renewable capacity is only expected to increase by 2.7 times from 2022 to 2030, a figure that falls short of the ambitious ...
