

What is a power station in Kosovo?

Part of the Global Coal Plant Tracker, a Global Energy Monitor project. Kosovo A power station is an operating power station of at least 610-megawatts (MW) in Obiliq, Kosovo, Kosovo with multiple units, some of which are not currently operating. It is also known as Kosovo power station. The map below shows the exact location of the power station.

What is the New Kosovo power plant?

The New Kosovo power plant is part of the government's plans to reform Kosovo's energy sector. Other plans include closing Kosovo A power station by 2017, rehabilitating Kosovo B power station to meet EU standards, and privatizing the country's electricity distribution system. Plans for New Kosovo also include a lignite coal mine, the Sibovc SW.

Will Kosovo a power station be refurbished by 2024?

In March 2023, Kosovo's new energy strategy until 2031 included plans to refurbish at least one unit of Kosovo A power station by 2024, in addition to both units of Kosovo B power station.

How many MWG are produced at Kosovo a power station?

In 2023, about 2.29 million MWg were produced at Kosovo A power station. In March 2023, Kosovo's new energy strategy until 2031 included plans to refurbish at least one unit of Kosovo A power station by 2024, in addition to both units of Kosovo B power station.

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

Why did Kosovo a power station explode?

On 6 June 2014, the Kosovo Energy Corporation's Kosovo A Power Station exploded killing two people and injuring thirteen others. The station was then subsequently shut down. The cause of the explosion was due to the explosion of a hydrogen tank located in a separate part of the power station from the generator.
