

Kyoto heatcube Belarus

What is Kyoto's heatcube?

Experience a transformative edge with Kyoto's Heatcube as we introduce real-time monitoring and control through digital innovation. Kyoto's DataOps platform, powered by Cognite Data Fusion, brings a new era of operational excellence, reducing operational expenses and offering state-of-the-art preventive and predictive maintenance.

Does Kyoto Group have a heatcube pipeline?

Kyoto Group has a large and growing pipeline of potential industrial customers exploring the Heatcube. Kyoto has signed several letters of intent and expects to sign more in the near future. The commercial pipeline covers multiple industries, including food and beverages, pulp and paper, corrugated cardboard, chemicals, and combined heat and power.

Is Kyoto heatcube ready to supply process heat?

Kyoto Heatcube is ready to supply process heat for industry now. Some fuels, like green hydrogen and green ammonia are better suited to supply the needs of transport and aviation. Lithium-ion batteries are very efficient for power companies and cars. None of these are likely to ever generate process heat. Electrification is the way forward.

Why did Iberdrola partner with Kyoto?

The partnership with Kyoto and its Heatcube thermal storage solution is a further step for Iberdrola in its mission to decarbonize the economy through electrification. Storage is one of the major challenges in the energy transition, hence this collaboration with the Norwegian group will be key to our strategy.

What is heatcube?

Heatcube; a long duration thermal energy storage solution with a molten-salt based modular system that enables industry to decarbonize process heat.

Who is Kyoto Group?

Kyoto Group is a Norwegian company founded in 2016 to capture and manage the abundant energy from the sun and wind, and apply it to reduce the CO₂ footprint for industrial process heat. Join our mailing list. Kyoto produces a thermal battery, Heatcube, which replaces oil, gas or diesel burners currently on site, and is charged using electricity.

Heatcube uses electricity to store thermal energy by heating molten salt to 415°C and then creating steam. Although the heat could also be used for industrial processes, and Kyoto Group is targeting the industrial ...

At Kyoto Group, we based Heatcube on this proven technology and scaled it down to make it available for

industrial production facilities. Heatcube consists of steel, salt and steam. With molten salt, Heatcube can provide saturated or superheated steam between 170°C and 400°C. And

Kyoto Group's Heatcube, a thermal energy storage (TES) solution, provides a sustainable and cost-effective alternative by capturing and storing abundant but variable energy from sources such as solar and wind. Founded in 2016, Kyoto Group is headquartered in Oslo, Norway, and has subsidiaries in Spain and Denmark. The Kyoto share is listed on ...

Heatcube von der Kyoto Group ist eine günstige, modulare Speicherlösung für Wärmeenergie mit hoher Kapazität, bei der Salze durch verschiedene erneuerbare Energiequellen auf über 415 Grad Celsius erhitzt und geschmolzen werden. Diese geschmolzenen Salze sind zurzeit die ausgereifteste Technologie für die Speicherung von Wärme bei hohen ...

Heatcube. Kyoto Heatcube provides thermal energy storage and heat generation in one product. It supplies industrial customers with the technology needed to lower both their costs for producing process heat and their CO2 emissions using intermittent renewable energy sources instead of fossil fuels for heat production.

Kyoto Heatcube está lista para suministrar calor de proceso para la industria ahora mismo. Vapor, no jet fuel. Algunos combustibles como el hidrógeno verde y el amoníaco verde son más adecuados para satisfacer las necesidades de la ...

El Heatcube de KALL Ingredients será la segunda generación del Heatcube de Kyoto, con una eficiencia de ida y vuelta del 93%, un rápido aumento y una carga y descarga desacopladas, diseñado para servir también como un activo flexible para la red, y la plataforma digital DataOps que soporta las operaciones y el mantenimiento del Heatcube.

Oslo, Norway, 2 November 2023 - Kyoto Group is proud to announce that we have raised the guaranteed round-trip efficiency (RTE) of Heatcube from previously announced 90% to 93%, when accompanied by a Service Agreement.. Based on numerous simulations, proven through tests at our commercial demonstration unit at Norbis Park in Denmark and detailed ...

Kyoto Heatcube(TM) can be configured to with capacities from 4 MWh to over 100 MWh, and with discharge load up to 25 MW. The energy efficiency with a thermal energy only discharge is 90%, while 65% thermal and 25% electric power can be extracted from the battery in a combined heat and power configuration (CHP).

Oslo, Norway 23 November 2023 - Kyoto Group, together with its financial partner, Kyotherm, and its energy trading partner in Hungary, Energiabáze, has entered into a set of agreements to deliver Heat-as-a-Service (HaaS) to the Hungarian food ingredient producer KALL Ingredients Kft while also acting commercially as a balancing asset on the grid. The signed Heat-as-a-Service ...

Oslo, Norway 27 October 2022 - Kyoto Group today launched the second generation of the Heatcube thermal

energy storage solution, offering up to five times higher energy density, lower cost and construction optimization. "Today, ...

Oslo, Norway 27 October 2022 - Kyoto Group today launched the second generation of the Heatcube thermal energy storage solution, offering up to five times higher energy density, ...

The Heatcube offers a modular and flexible design, fast response time on charge and discharge and no use of dangerous chemicals. It can be configured with storage capacities from 16 MWh to over 96 MWh, with a charge effect of either 10, 20 or 30 MW and a discharge effect for each Heatcube of up to 5 MW. The Heatcube is extremely flexible.

Kyoto Group's Heatcube, a thermal energy storage (TES) solution, provides a sustainable and cost-effective alternative by capturing and storing abundant but variable energy from sources such as solar and wind.

Kyoto Group partners with Hydro and others and does an IPO. The first Heatcube thermal battery is ordered to be installed as a commercial demonstration unit. Kyoto signs the first commercial contract for the Heatcube under a battery leasing agreement with ...

The signed Heat-as-a-Service agreement with KALL Ingredients builds on the letter of Intent reported by Kyoto on a no-name basis on January 10 th 2023 and the term sheet announced August 22 nd 2023. The 15-year HaaS agreement outlines the commercial conditions for delivering high quality steam to one of the newest corn processing plants in Europe, ...
