

Is China's Fengning power station the world's largest hydro power plant?

China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world. China's Fengning Station: World's Largest Pumped Hydro Power Plant Sets New Global Benchmark

How big is China's Fengning pumped storage power station?

China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world. Located in Hebei province, this cutting-edge facility has a total installed capacity of 3.6 GW and is operated by the State Grid Corporation of China (SGCC).

Where is Fengning pumped storage power station located?

The Fengning pumped storage hydropower plant in Hebei province (courtesy: State Grid Corporation of China) China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world.

Will China expand its hydropower capacity by 2027?

With the Fengning station now online, China is on track to expand its pumped storage capacity to 80 GW by 2027, with a broader goal of reaching a total hydropower capacity of 120 GW by 2030.

Is China leading the world in hydropower development in 2024?

According to the World Hydropower Outlook 2024, China continues to lead the world in new hydropower development, with 2023 alone seeing the country bring 6.7 GW of new capacity into service, including more than 6.2 GW of pumped storage hydropower.

When was Fengning power station built?

Construction of the Fengning station began in June 2013, with the Gezhouba Group securing the main contract to build the power station in April 2014. The project was constructed in two phases, each involving six 300 MW reversible pump-turbine units, together delivering the full 3.6 GW of installed capacity.
