How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I choose a solar panel system for my home?

Before you size a solar panel system to fit your energy needs, consider undergoing a home energy audit to uncover anything that makes your home less efficient. Switching to energy-efficient lighting and appliances or weatherizing your home may help to lessen your electricity expenses. 2. Determine if your home is structured for solar

How do I install my own solar panel array?

The easiest way to install your own solar panel array is to buy a solar panel kit. The main solar components that come with every solar power system or solar panel kit are: Solar Panels Solar panels convert sunlight into electricity through a process called the photovoltaic effect.

Can you install solar panels off-grid?

Many zoning laws also prohibit installing off-grid solar energy systems. DIY solar panels work best for small projects or to supplement a traditional energy source. If you want to power your home with solar, we recommend hiring one of the top solar companies to design and install your system.

How do I install a solar system?

Engineering site visit The first step to installing your solar system is an engineer site visit. After you sign a solar contract, an engineer will come by your property to evaluate the electrical status of your home and ensure everything is compatible with your incoming solar installation.

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.
