What is gridtential battery technology?

By integrating silicon wafers into an advanced bipolar battery architecture,Gridtential's technology gives manufacturers the key to building the lead battery they have wanted for decades. It meets emerging markets' need for long life,high power,lighter weight,and increased fire safety.

What is gridtential technology?

The technology revitalizes yesterday's factories,allowing battery manufacturers to dramatically grow their revenues. By integrating silicon wafers into an advanced bipolar battery architecture,Gridtential's technology gives manufacturers the key to building the lead battery they have wanted for decades.

How does energy affect Lebanon's economy?

Energy and electricity demand have weighed heavily on Lebanon's economy. Imported fuel oil accounts for nearly a quarter of the national budget deficit,while electricity demand outpaces power generation capacity. Renewable energy technologies,in contrast,offer the prospect of clean,fully domestically sourced power and heat systems.

Why did Turkish Karpowership stop supplying electricity in Lebanon?

In May 2021,Turkish Karpowership,which provided Lebanon with 370 megawatts (MW) at a cost of \$850 million per year,ceased supplying electricity due to payment arrears of \$100 million,and legal threats to its two barges,MV Karadeniz Powership Fatmag&#252;l Sultan and MV Karadeniz Powership Orhan Bey.

Who is the gridtential executive team?

The Gridtential executive team features a group of serial inventors,entrepreneurs,and disruptorswho have galvanized industries,launched companies,and dedicated their entire careers to technological innovation. Gridtential is guided by an industry-leading Board of Advisors that provide strategic,technical,and operational support.

By integrating silicon wafers into an advanced bipolar battery architecture, Gridtential"s technology gives manufacturers the key to building the lead battery they have wanted for decades. It meets emerging markets" need for long life, high power, lighter weight, and increased fire safety.

Gridtential Energy, the firm behind the of Silicon Joule bipole battery technology, has announced a product development agreement with car batteries manufacturer Camel Energy and a top-three U.S. automaker for the delivery of start/stop batteries for internal combustion engine (ICE) vehicles.
