

# Lego solar power generation

How much energy does Lego use?

The total output from the investments by the LEGO Group in renewables now exceeds the energy consumed at all LEGO factories, stores and offices globally. In 2016, more than 360 gigawatt hours of energy were used by the LEGO Group to produce the more than 75 billion LEGO bricks sold around the world during the year.

How many solar panels will be installed on the Lego's factory roof?

o 20,000 solar panels will be installed on the roof of the LEGO's factory in Jiaxing, China. The panels will produce almost six gigawatts of energy per year. This is equivalent to the electricity use of more than 6,000 Chinese households.

How did Lego reach the 100% renewable milestone?

Reaching the 100% renewable milestone was a target inspired by the LEGO Group's partnership with the WWF Climate Savers programme. The LEGO Group works with other partners to advocate for investment in renewable energy and has joined the RE100, a global initiative of companies committed to using 100% renewable energy.

Will Lego stop investing in renewables?

Officially opened in mid-May, the new 258 MW wind farm has capacity to generate clean power for more than 230,000 British households. CEO of The Lego Group Bali Padda said they won't stop investing in renewables now that they have balanced their energy usage.

Does Lego have a wind farm?

Since 2012, the LEGO Group has supported the development of more than 160 megawatts of renewable energy. The latest investment is a 25% stake in the Burbo Bank Extension wind farm off the coast of Liverpool, UK. The wind farm, which was officially opened today, will generate clean power for more than 230,000 British households.

Will Lego Build a new solar park?

Billund, March 1st, 2023: After having installed Denmark's largest roof-mounted solar farm at its headquarters in Billund, Denmark in 2019, the LEGO Group today unveils that it hopes to build a new 80-100 MW solar park.
