What is happening in Liberia's energy sector?

The update highlights key advancements in Liberia's energy sector, including notable progress in power generation and the expansion of energy access. However, despite these gains, the country faces significant power shortages, calling for substantial investments to achieve reliable, affordable, and sustainable energy access for all Liberians.

Why is reliable energy important in Liberia?

The report offers a comprehensive analysis of recent economic developments in Liberia, underscoring the crucial role of reliable energy in fostering sustainable growth. The update highlights key advancements in Liberia's energy sector, including notable progress in power generation and the expansion of energy access.

How did Power Africa support the Liberia Electricity Corporation?

Power Africa supported the Liberia Electricity Corporation as they entered into a public-private partnership arrangement with Jungle Energy Power (JEP), a local energy firm, to operate and manage the Bong County grid.

How can Liberia improve energy security?

One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation. By harnessing these indigenous and sustainable energy resources, Liberia can decrease its reliance on imported fuels and enhance its energy security.

What energy sources does Liberia use?

Liberia also utilizes other energy sources on a smaller scale. These include small-scale renewable energy systems such as solar and biomass. However, the contribution of these sources to the overall energy mix in Liberia is limited. Abundant and clean energy sources, reducing reliance on fossil fuels.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country ≥ 20 MW of electricity in 2020. Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.

CIE will deliver to Liberia 25 megawatts on December 1, 2022 and go up to 27 megawatts in January 2023." As Liberia prepares to meet its future energy needs, LEC will shortly begin the implementation of a 20-megawatt solar power project and the expansion of the Mt. Coffee Hydropower Plant by two additional turbines.

The Liberia Electricity Corporation (LEC) is a public utility created in 1973 by the Government of the Republic of Liberia. This entity was developed through an act of Legislature with a mandate to produce and supply economic and reliable electric power to the entire nation, while at the same time maintaining the
