

What is solarduck?

SolarDuck was founded on the belief that solar energy will play a crucial role in future energy production. With land availability constraints rising in growing coastal cities, offshore solar deployment opens a new frontier.

How did solarduck win a wind farm tender in 2022?

SolarDuck partnered with RWE and won the Hollandse Kust West offshore wind farm tender in November 2022. In 2022, SolarDuck opened an office in Fornebu, Oslo to coordinate global sales. Recognizing the need for offshore testing, SolarDuck chose the challenging conditions of the North Sea.

What is 'king eider' & how does 'solarduck' work?

Launched in April 2021 in IJzendoorn in the Netherlands, SolarDuck's first pilot dubbed 'King Eider' consists of four triangular-shaped units, which are mounted by 156 solar panels and deliver a combined electrical output of 64kWp to the grid. The structure holds the solar panels more than three meters above water level.

How will dMEC support solarduck?

Via the subsidy, MARIN will support SolarDuck in the technical evaluation of surviving the harsh environmental conditions on the sea, while DMEC will support the company with investment and funding strategy development. As part of the project, INNSEA will back SolarDuck with levelised cost of electricity (LCoE) analysis.

SolarDuck is a Dutch-Norwegian company that is pioneering the technology to bring solar PV to the seas, and we are looking for talented individuals to join our team. As a spin-off of Damen Shipyards, a leading Dutch shipbuilder, SolarDuck was founded in 2019 by a team of experienced entrepreneurs from the maritime industry. We are headquartered ...
