Are solar-powered kennels safe?

As the country experiences increasing occurrences of extreme weather, having a solar-powered kennel is a safe, reliable and eco-friendly method for ensuring your pet's health and safety during an emergency. Adapting your dog house or other outdoor pet enclosure with solar panels is a fun and relatively easy DIY solar project.

Can You Adapt A dog house with solar panels?

Adapting your dog house or other outdoor pet enclosure with solar panels is a fun and relatively easy DIY solar project. Here are the basic parts you'll need to get the job done:

Are solar kennels right for your pet?

Whether you're creating a DIY solar kennel to provide climate control for your pet or you're looking to upgrade the sustainable operations of a large board or rescue, solar provides a number of benefits for the safety and wellbeing of your pets, your wallet and our environment.

Are pet owners using solar energy?

It isn't just individual pet owners who are exploring the benefits of solar energy. Some local boards and shelters are making their operations more sustainable, cost-effective and safe with solar energy.

How do I use a solar panel for my Dog silencer Max?

Obtaining direct line of sight has never been easier when using the Solar panel. Place your Dog Silencer Max in high-up, hard-to-reach areas like tall trees or second-story windows. Equipped with an IPX4 water resistance rating that protects against sprinklers and light rain.

Can a solar panel be charged indoors?

Yes. For best results the solar panel should be fully charged prior to plugging it into the Dog Silencer, so the device can draw full power right from the beginning. You can charge the solar panel indoors using the included ac adapter, or you can leave it out in the sun for at least 8 hours. What is the shape of the coverage area?
