

The objective of the Regional Off-Grid Electrification Project (ROGEP) is to provide targeted West African countries with needed support to foster a sustainable and scalable off-grid electrification market to meet the electrification needs of unserved populations. ROGEP The Regional Off-Grid Electrification Project (ROGEP) will aim to increase electricity access to households, ...

3rd International Off-Grid Lighting Conference and Trade Fair, Dakar, Senegal 2012. Held November 13-15, 2012, in Dakar, Senegal, Lighting Africa's third International Off-Grid Lighting Conference and Trade Fair reinforced its position as the premier global event on lighting and energy access. ...Read More

As one of the poorest countries in the world, end-users in Niger largely lack the funds to purchase solar products. Lighting Africa has been working to address barriers on the supply-side so as to increase access and affordability to consumers. Until recently high import taxes drove up the costs to end-users, while poor-quality products dominated

Early Support for Off-Grid Solutions With support from the government, momentum of the off-grid solar lighting and energy market in Burkina Faso has been steadily growing over the past decade. In 2009 the "Une lampe pour l'Afrique" project, aimed at distributing solar lamps among schools, was launched by the Taiwanese Development Cooperation; The 2013 budget

Ce rapport r  sume le projet Luminoth  que au S  n  gal. La Luminoth  que est un nouveau mod  le d'approche compos   de lampes solaires pico donn  es    des   coles dans les zones rurales s  n  galaises pour permettre aux   tudiants d'emprunter des lampes pour   tudier le soir. Le rapport pr  sente en d  tail la conception et l'  cution du mod  le ainsi que les r  sultats

Without electricity, energy and lighting options are limited, and fuel woods currently dominate the energy balance - especially for cooking. And while there is a clear demand for off-grid solar solutions, the current availability of products meeting Lighting Global Quality Standards is inadequate. Solar is cheaper, there aren't power cuts and protects the environment. -Market

PAYGo MARKET ATTRACTIVENESS INDEX (2019) Lighting Global has released the 2019 version of the Pay-As-You-Go Market Attractiveness Index (PAYGo MAI) for 24 countries across Sub Saharan Africa and Asia. The PAYGo MAI provides businesses, policymakers, and practitioners with a flexible and accessible tool that can be used to assess ...

This study documents the price of kerosene in rural areas of five African countries: Senegal, Mali, Ghana, Tanzania and Kenya. The goal is to document the cost of kerosene for those who buy in small quantities in order to better inform cost benefit analyses for the transition from kerosene lighting to modern off-grid lighting systems.

Held November 13-15, 2012, in Dakar, Senegal, Lighting Africa's third International Off-Grid Lighting Conference and Trade Fair reinforced its position as the premier global event on lighting and energy access. At the event more than 400 off-grid lighting stakeholders and over 40 exhibitors met to discuss and showcase the latest developments in off-grid lighting technologies

The company, which is an Associate Member of the Lighting Africa program, plans to extend this technology transfer effort further to Senegal, where a school for solar technicians will be constructed starting December. Solux expects to have its new lanterns assembly workshop up and running by April 2013.

Children read a school book with a solar lamp in Dakar, Senegal. Bruno D&#233;m&#233;ocq/Lighting Africa The IFC/World Bank-supported Lighting Global Quality Test Methodology has become the world standard for clean off-grid lighting products, following its incorporation into an International Electrotechnical Commission technical specification on 3 ...

A new manufacturer of portable solar lamps overcame tough competition to win two of the five 2012 Outstanding Product Awards announced at the Third International Off-Grid Lighting Conference and Trade Fair in Dakar. Marathoner CLP dazzled judges and consumers with two products; a competitively priced single-task light powerful enough to light ...

Senegal: Mapping the Supply Chain for SLPs Catering to the BOP 2 EXECUTIVE SUMMARY Situation: With 50% of population not having access to electricity (90% of whom are in rural areas), access to affordable, reliable lighting is limited in Senegal. Solar portable lanterns (SPLs) can provide for this lighting need in a sustainable way.

The Lighting Africa - Nigeria program was launched in March 2015 to increase access to better, cleaner and safer off-grid lighting and energy products for the rural and peri-urban populations with no access to the grid. Our key objectives from the outset of the program were to help six million people gain access to clean,

Today, there are about 733 million people worldwide living without access to electricity - down from 1.2 billion in 2010. Despite this significant increase, at the current rates of progress, the world will reach only 92 percent electrification by 2030 - falling far short of the SDG7 goal of universal energy for all by 2030.
