

# Lion battery technologies France

Who is Lion Battery Technologies?

Credit: &#169; Anglo American. Lion Battery Technologies, a subsidiary of platinum-group metals (PGM) miners Platinum Group Metals and Anglo American Platinum, has been issued a US patent for its next-generation battery technology using platinum and palladium.

Where are lion batteries made?

Lion batteries are made in China, by a Chinese manufacturer. They're exceptionally low cost. But their quality is still decent enough for us to recommend them. But of course, you're taking somewhat of a risk by getting a battery like this.

Is platinum and palladium the future of battery technology?

The possibility of creating additional demand for platinum and palladium in the battery technology space is an exciting development and of strategic importance to both parties.

Lion Battery Technologies, a subsidiary of platinum-group metals (PGM) miners Platinum Group Metals and Anglo American Platinum, has been issued a US patent for its next-generation battery technology using ...

Lion is also currently reviewing several additional and complementary opportunities focused on developing next-generation battery technology using platinum and palladium. Thanks to considerably higher energy density, Lithium Oxygen and Lithium Sulfur batteries can perform better, by orders of magnitude, than the best-in-class Lithium-ion ...

Here's the definitive Lion Battery Review. Answering the questions, are they actually any good? Here's the pros and cons from our testing. ... as well as other vehicle technology.
