Sunly, an independent green energy producer, is planning to build Lithuania's largest solar park in Kai?iadorys for prosumers. The park, with an installed capacity of around 40 MW, will cover an area of almost 50 hectares. Sunly will use modern solar modules that adapt to the sun's movement which al...

1 ???#0183; The new study does not reveal when the Sun will throw its next fit. However, the results urge caution: Even the most extreme solar events are part of the Sun's natural repertoire. Journal Reference: Valeriy Vasilyev, Timo Reinhold, Alexander I. Shapiro et al. Sun-like stars produce superflares roughly one per century, Science.

In a renewable energy experiment combining sun, water and ice, a Lithuanian power firm aims to install floating solar panels on a lake at a hydroelectric plant this year as part of a small but...

Danish solar energy company Nordic Solar is building its largest solar park to date, located in Moletai in eastern Lithuania about 60 km from Vilnius. The new solar park, which is currently under construction, is expected to start producing electricity in the first half of 2024.

Being built in the region of Svencionys, about 80 km (49.7 mi) north of the capital Vilnius, the company's second Lithuanian solar farm is expected to generate enough electricity to meet the annual demand of roughly 26,000 European homes. The plant will be equipped with bifacial PV modules mounted on Nordic Solar's

proprietary steel construction.
