How can energy customers avoid power outages from load shedding?

On a household level, energy customers can look to avoid power outages from load shedding by converting to solar power or purchasing a generator. The advantages of having such a system in place, for when load shedding does occur, far outweigh the cost.

What happens during a load shed event?

When power outages are required during a load shed event, customers are grouped together into clusters and their power supply is limited by the operator. Power in the group's electricity conductors is turned off and on intermittently to homes and businesses, until the network is stabilised.

Would losing Syria be a big blow for Iran?

Losing Syria would be "a huge blow" for Iran, Parsi said. "The investment Iranians have made in Syria is very significant, it's an important land bridge to Lebanon, but also the alliance the Iranians have with the Assad regime has lasted across the Islamic Republic's history."

How can I determine if I need backup power?

To determine if you need backup power, first calculate the total power rating (in WATTS) of all the devices you want to power during a power outage. This is known as your load. You can find this information on stickers on the devices themselves or in the product manuals. We recommend working out the size of your load before shopping around for backup power.

Does Sinetech offer a long backup power solution?

Does Turkey want a rapprochement with Syria?

Despite its support for opposition forces, Turkey has not ruled out a rapprochement with Syria. President Recep Tayyip Erdogan has called for a meeting with Assad, the man he once labeled a terrorist, to reset relations. Assad has refused to meet him as long as Turkey continues to occupy parts of his country.

A new feature is discussed in Appendix D (page 50) of the Powerwall installation manual: Load Shedding. Effective April 16, 2020, sites can be designed to use the new feature. The backup gateway can be wired to control a specific load. The example given is for air conditioning. The load can be shed when Powerwall is off-grid.
