

Longi photovoltaic panel built-in barcode

How does Longi package a module?

LONGi packages each pallet as follows: Cardboard sleeve(remember that the glass side of the module is directly on the other side of the cardboard. Do not cut into the cardboard with a sharp object on the sides) Before you unpack your modules,check the shipping label to ensure you received the right modules.

Where is the serial number on a Longi module?

The matching serial number is located on the frame and on the rear of the module. LONGi uses industry best practices to load modules for transit in shipping containers.

How to calculate VOC in a Longi module?

(LONGi modules maximum system voltage is DC1000V/DC1500V---ac-tually system voltage is designed based on the selected module and inverter model.) The correction value of VOC can be calculated by the following formula. $C_{Voc} = 1 - \alpha_{Voc} \cdot (25 - T) / T$: The expected lowest temperature of the installation site.

How do I know if my PV modules have been shipped?

Before you unpack your modules,check the shipping label to ensure you received the right modules. Once you unpack your modules,check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module.

Where should Longi modules be installed?

LONGi modules shall be installed on proper buildings or other appropriate places (such as ground,garage,building outer wall,roof,PV tracking system) but shall not be installed on any vehicles. Do not install modules at places that are possible to be flooded.

How does Longi load modules for transit in shipping containers?

LONGi uses industry best practices to load modules for transit in shipping containers. No unsupported,free-standing pallet stacks. Pallets parallel to the vessel,with any spaces greater than 4 inches to be filled with airbags. When the modules arrive,identify your modules and then inspect the packaging for any visible damage.
