

Lydian energy United Kingdom

How much energy does Lydian use?

Lydian's technology can achieve a total energy consumption approaching 2 kWh per kilogram for the reduction of CO₂, a key step in the process, which the company says will be 30% to 50% lower than competing technologies like CO₂ electrolysis.

What is Lydian International Limited?

Lydian International Limited, along with its subsidiaries, is a company that explores for and develops mineral properties in the Caucasus region. Its primary focus is on exploring gold and silver ores. Lydian International Limited mainly focuses on its 100% owned Amulsar gold project, which covers an area of 113 square kilometers and is located in south-central Armenia.

Does Lydian use carbon-negative E-fuel?

Lydian also aims to produce carbon-negative versions of many other industrial chemicals. "We believe fuels produced with our technology will consume less energy per gallon than any other e-fuel."

What's new at Lydian?

CAMBRIDGE, Mass., Sept. 6, 2023 /PRNewswire/ -- Lydian, a startup aiming to produce sustainable, CO₂-derived fuels and chemicals, has announced \$12M in new seed funding co-led by Congruent Ventures and Galvanize Climate Solutions.
