

Does Macao have solar energy?

Clearly, Macao has a tremendous potential for developing solar energy, especially a grid-connected photovoltaic system. Its small and densely populated area, however, make it unsuitable for large-scale solar-power plants, and Macao has therefore chosen roof-top solar technology as the most effective way to utilize solar energy.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Does offshore wind energy make sense in Macao?

"In our view, as external observers, offshore wind energy in Macao's territorial waters makes sense, as does the development of distributed generation of photovoltaic energy. Macao has a lot of sun and many roofs. There is a potential to develop this vector in the medium-to-long term."

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated.

Is energy consumption increasing in Macao?

As discussed above, the total energy consumption in Macao still showed an increasing trend. However, as shown in , from the perspective of energy consumption per capita and energy intensity per million MOP (the Macau dollar; 1 US dollar = 8 MOP), there have been some significant improvements.
