Figure ES-1. Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to 2022. ... Because of rapid price changes and deployment expectations for battery storage, only the publications released in 2022 and 2023 are used to create the projections. In addition to the publications in Table 1, we also include a 2020

The price of lithium-ion battery cells declined by 97% in the last three decades. A battery with a capacity of one kilowatt-hour that cost \$7500 in 1991 was just \$181 in 2018. That's 41 times less. What's promising is that prices are still falling steeply: the cost halved between 2014 and 2018. A halving in only four years.
