

What is Malaysia's feed-in tariff system?

Source: Energy Commission of Malaysia (2015). Malaysia's feed-in tariff (FiT) system obliges distribution licensees to buy from feed-in approval holders the electricity produced from renewable resources (renewable energy) and using the FiT rate, as set by the Ministry, through the Sustainable Energy Development Authority (SEDA).

How long does renewable power generation last in Malaysia?

The duration is 16 years for biomass and biogas resources, and 21 years for small hydropower and solar photovoltaic (PV) technologies. Table 4.7. Financial Support for Renewable Power Generation kWh = kilowatt-hour, PV = photovoltaic. Source: Sustainable Energy Development Authority (SEDA) Malaysia, 2017.

Do you need a licence to supply electricity in Malaysia?

The act requires any activity related to the supply of electricity to be licensed. In accordance with the Electricity Regulations 1994 (and amendment 2003), two types of licences may be granted: public and private. The Energy Commission (ST) issues licences for the operation of such facilities in Peninsular Malaysia and Sabah.

Why should you invest in a solar panel in Malaysia?

One of the most clear-cut benefits of a solar panel in Malaysia is the ability to hedge utility prices. Industry electricity prices have gone up annually. By investing in a solar energy system now, you can have a fixed electricity rate and secure protection against volatile electricity costs.
