

Malaysia sanko energy

Who is Sanko Energy Group?

SANKO Holding brought its investments for the energy, which it started in 1997 to meet the energy needs of the subsidiaries of SANKO Holding, under a single roof and established SANKO Energy Group in 2006.

How does Sanko Energy Group contribute to sustainability?

Contributing to reduction of carbon emissions by manufacturing based on 100% renewable energy, SANKO Energy Group also has significant contributions to sustainability through its technology- and efficiency-driven investments and operations.

What does Sanko energy do?

As an active member of Deniztemiz TURMEPA Association, which adapts protection of the coasts and seas of our country as a mission, SANKO Energy collects waste, sewage and bilge discharged from the boats and prevents millions of liters of liquid waste from mixing into the sea by the waste collection boat it sponsors in Goecek and Bodrum.

Does Malaysia use hydroelectricity?

Malaysia is significantly expanding its use of hydroelectricity, which accounted for 18% of Malaysia's total installed capacity and 17% of electricity generation in 2017.

Will Malaysia compete with Singapore's oil refining & petrochemicals integrated development project?

As part of Malaysia's goal to compete with the oil refining and storage hub in Singapore, Petronas has nearly completed a refining and petrochemicals integrated development project (RAPID) in Johor, located at the southern tip of Peninsular Malaysia.

Why does Malaysia need more natural gas?

Malaysia currently has a geographic disparity between natural gas supply and demand; Peninsular Malaysia demands more natural gas to fuel the power and industrial sectors, while the eastern states of Sarawak and Sabah, located on Borneo Island, produce natural gas.
