

Maldives maison solar

How much does a solar project cost in Maldives?

In 2022, 63 investors expressed interest in the third 11 MW solar project in the remote islands of Maldives, and a record low price of 9.8 US cents was received. This is one of the lowest tariffs for any small island developing state (SIDS).

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

When will the Aspire project start in the Maldives?

The inauguration of the 5 MW solar project on December 7, 2022 under the ASPIRE project has been a game changer in the energy transition journey of the Maldives.

Is the Maldives a sustainable investment destination?

This journey, which started in 2014, is now seeing unprecedented interest from international investors and helping establish the Maldives as an investment destination for sustainable projects.

Will Maldives become net-zero by 2030?

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ambition to become net-zero by 2030 at the UN Climate Ambition Summit in December 2020.

Specifically for Maldives, regional data accuracy enhancement procedure was applied. Uncertainty of the solar resource data has been reduced by the regional model adaptation based on the ground measurements collected at solar meteorological stations, located across the country. GIS data is provided in higher spatial resolution and also as long-term monthly averages.

The Westin Maldives Miriandhoo Resort, situated in Baa Atoll, the first UNESCO Biosphere Reserve site in the Maldives, has announced the completion of a new solar project, which will save energy and minimise environmental impact. The resort is blessed with a year-round tropical climate, and to utilise this, they created the solar panel project, which [...]

The Project involves the development of 36 MW solar power project and 50 MWh of battery energy storage solutions across various selected islands in the Maldives. The Project also involves grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.
