

Why is Mali building a new solar power plant?

As Mali grapples with an ongoing electricity crisis that hampers economic growth, transitional President Assimi Goita laid the foundation stone for a new 200 MW photovoltaic solar power plant. The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector.

Why is Mali launching a 200 MWp solar power plant?

Loading... Mali's President Assimi Goita has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

Which company is constructing a new energy plant in Mali?

The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector. In recent weeks, Mali's transitional government has intensified efforts to implement this solution nationwide.

How much will NovaWind invest in Mali?

NovaWind will invest EUR200 million in the Mali project, expected to be operational in 12 months. The plant aims to supply 10% of Mali's electricity. Before the construction commenced, President Goita met with NovaWind's Managing Director, Grigory Nazarov, to discuss the project's progress.

Where is the largest solar power plant in Sub-Saharan Africa?

On May 24, 2024, President Goita visited Sanankorobain the Kati Cercle to initiate the construction of the largest solar power plant in sub-Saharan Africa, covering 314 hectares. About thirty kilometers from the capital, Bamako, this project is part of a government partnership with NovaWind.

What is NovaWind doing in Mali?

About thirty kilometers from the capital, Bamako, this project is part of a government partnership with NovaWind. The company, based in Moscow, recently entered into an agreement with Kyrgyzstan to develop 1,000 MW of renewable energy. NovaWind will invest EUR200 million in the Mali project, expected to be operational in 12 months.

Like most West African countries, Mali relies heavily on fossil fuels but has significant potential in solar and wind energy. Mali's strategy is oriented towards fostering the development of renewables even though their share, except for hydro, remains rather low. In 2020, Mali adopted the Desert to Power National Roadmap quantifying its country-level targets, identifying priority ...
