

How has Malta changed its energy mix?

In recent years, Malta has transformed its energy mix used for electricity generation from one based on heavy fuel oil and gasoil to a more sustainable combination of natural gas, electricity imports via the Malta-Italy subsea connection, and increased use of renewable energy sources.

Does Malta have a national energy and Climate Plan?

Malta has developed its first National Energy and Climate Plan (NECP) in line with the obligations of the Governance Regulation. Malta's NECP follows the scope of the Energy Union and covers its five dimensions: decarbonisation, energy efficiency, energy security, internal energy market, and research, innovation and competitiveness.

What is Malta's energy mix?

% Gas 31%
Energy mix for Electricity Generation
Over the past five years, Malta has transformed its energy mix used for electricity generation from one based on heavy fuel oil and gasoil, to a more sustainable energy mix based on gas, gasoil (for backup), renewables, and electricity

What is Malta's energy strategy?

secure, affordable and clean energy solutions. Malta's recent investment in the energy sector is aimed to build sufficient capacity to match the forecasted growth in electricity demand in the foreseeable future. The strategy hinges on an electricity mix made up of renewables, intercon

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

What does the EU Energy Union say about Malta?

fundamentals expressed by the EU Energy Union. The underlying objectives guiding Malta's energy of interconnection for electricity supply; and Overhauling the generation capacity of the country with a view to achieving higher efficiency gains whilst stimulating investment in natural gas infrastructures. A number of th

Che tu sia interessato a un impianto fotovoltaico, necessiti di consulenza per il Conto Termico o semplicemente vuoi esplorare le opzioni per una vita più verde, siamo qui per guidarti. Utilizza il modulo sottostante, inviaci una email o chiamaci direttamente.

Malta: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Nevertheless, Malta's efforts in energy efficiency post-2020 will seek to achieve cost efficient energy savings in the relative sectors whilst taking into account the effective potential. Malta will strive to continue decreasing the overall energy intensity of its economy and uphold its obligations under the Energy Efficiency Directive 2012 ...
