

Mantis energy ltd U S Virgin Islands

Who is Mantis energy?

"We are Mantis Energy and we believe that new and existing homes can be built better. We design new and existing buildings into energy efficient, low running cost, future homes"

Do St Thomas and St Croix have electricity?

As of late 2014, both St. Thomas and St. John were served by one electrical grid run by the Virgin Island Water and Power Authority (WAPA). St. Croix, however, has a separate electrical grid in the WAPA service area. More than 1,000 distributed renewable energy systems were connected to the WAPA grid.

How does oil affect the cost of electricity in the USVI?

The USVI, like many island nations, is heavily reliant on fossil fuels for electricity generation. This reliance leaves the USVI vulnerable to global oil price fluctuations, which directly impact the cost of electricity. Assumes an average electricity price of \$0.50/kWh and consumption of 767.4 gigawatt-hours (GWh).

What is the cost of electricity in the USVI?

The electricity rates in the USVI are \$0.47 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

How much energy can St Croix generate from biomass?

St. Croix has a moderate potential to generate 3 MW to 5 MW of energy from biomass due to the majority of the island being covered with forest. Landfill gas also has an expected capacity of about the same.

What is the cost of wind energy in St. Croix?

The cost of wind energy in St. Croix ranges from \$0.08 to \$0.14 per kWh. The localized cost of energy from utility-scale wind projects ranges from this amount. St. Croix has moderate potential to generate 3 MW to 5 MW of energy from biomass because the majority of the island is covered with forest. Landfill gas has an expected capacity of about the same.

Mantis energy ltd U S Virgin Islands

"It propels us closer to our goal of achieving 30% renewable energy consumption in the US Virgin Islands, fostering a cleaner and greener energy ecosystem," US Virgin Islands Governor Albert Bryan Jr said. According to the EIA, about 80% of the solar that is installed on the islands is distributed rooftop PV, and only 20% utility-scale.

In response to escalating energy challenges, Governor Albert Bryan Jr. of the United States Virgin Islands has issued Executive Order No. 537-2024, declaring a State of Energy Emergency. The proclamation comes amidst mounting concerns over the stability of the territory's power supply, exacerbated by global geopolitical tensions and local financial strains. ...
