How good is Maxer technical support?

Date of experience: September 04, 2024 Maxer's technical support team provides a great service as part of my hosting plan (through which I manage several sites running MySQL databases). While I can fix most common or routine problems myself, I have found their responses to my occasional requests to solve more complex issues truly excellent.

Is Maxer a good hosting company?

Our school has been with Maxer (formerly Spiral Hosting) for about 20 years and I have never considered looking elsewhere to host our site. They have always come good, and very promptly at that, whenever we had any issues, technical or otherwise. An excellent hosting company that I can't recommend highly enough. Date of experience: August 30, 2023

Is Maxer a good Hoster?

Absolutely love MAXER. I recommend them to all my clients. Their support team is absolutely top notch. I've worked with a few online hoster's and 'local' location based hoster's, and Maxer is by far the best. Their pricing is also incredibly competitive for the market. 100% recommend Maxer, I've never had an issue with them.

In 2006, Mixer Systems introduced the first Planetary Mixer to be designed and manufactured in the United States. A patented design, it produces a thoroughly-blended mix in as little as 30 seconds. In contrast to companies that simply ...
