

How do I use the Global Solar Atlas?

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

What is ESMAP's Global Solar Atlas?

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential sites for solar power generation virtually anywhere in the world.

Why is the World Bank launching a global solar atlas?

The World Bank, in partnership with the International Solar Alliance (ISA), launched the Global Solar Atlas at the World Future Energy Summit in Abu Dhabi. It serves as an example of the World Bank's commitment to ISA and to scaling up renewable energy in client countries.

What are the different types of PV electricity calculation used in Global Solar Atlas?

There are several variants of PV electricity calculation used in Global Solar Atlas. Theoretical is used for site prospection on "Site Data" tab. It uses generalized theoretical settings for a quick assessment of PV power potential for the selected site.

How accurate is the Global Solar Atlas?

While the data powering the Global Solar Atlas is the most recent and most accurate currently available, it is not fully validated in many developing countries due to the lack of ground-based measurement data from high precision solar radiation sensors.

What is included in the global irradiation Atlas?

The atlas includes the global horizontal irradiation, diffuse horizontal irradiation, global terrain elevation, global optimum tilt for equator-tilted PV modules, global potential PV electricity production, global irradiation at optimum tilt, and global air temperature at 2 m height.

Real-Time Weather Conditions: Outdoor sensor measures temperature, humidity, wind speed, wind direction, UV index, barometric pressure, and rain totals; High-Definition Display with ...

Atlas Copco Power Technique inaugurated its new solar panel installation at the Paragon Way facility in Rock Hill, South Carolina. The 2,397 roof-mounted solar panels will provide ...

The potential for clean, carbon-free electricity generation from solar photovoltaic (PV) sources in most countries dwarfs their current electricity demand. Around 20% of the global population lives in 70 countries

boasting excellent ...

CSP Concentrated solar power systems, which use mirrors or lenses to concentrate a large amount of sunlight onto a small area, where it is converted to heat for a heat engine connected ...

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential sites for solar power generation virtually anywhere in the world.

The Berlin solar atlas was facilitated by calculation of roof solar potential (SUN-AREA 1) developed by a team of researchers led by Prof. Dr. Martina Klaerle at the University of Applied Science at Osnabrück (Germany). ...

Atlas said that the project is the second-largest PV installation in Mexico, and the first large-scale solar project in Campeche. This article requires Premium Subscription Basic (FREE) Subscription

A fully integrated renewable energy atlas is presented which provides the wind and solar photo-voltaic (PV) power generation potential as well as cooling demand for Pakistan at a temporal ...

The determination of the levels of solar radiation incident on the terrestrial surface ($\text{W}\cdot\text{m}^{-2}$) is essential for several areas such as architecture, agriculture, health, power generation ...

Free and open access to photovoltaic (PV) electricity generation potential for different technologies and configurations. Available in English, French, Italian, Spanish and German. Extensive supporting documentation - see the links at ...

The Colombian Solar Atlas uses basic and advanced photovoltaic generation models to estimate the generation of a custom solar installation. With this tool, a user selects a ...
