

Merus power Puerto Rico

Why does Puerto Rico need electricity?

Every day we depend on electricity. We need it to run lights on the roads, produce goods and services, and keep the economy moving. Our job is to provide you with safe, strong, reliable electric service. The transformation of the electric grid, coupled with better services and rapid response, will allow us to live in a better Puerto Rico.

Why did Puerto Rico get a power outage?

The announcement comes as the U.S. territory continues to struggle with chronic power outages that have worsened since Hurricane Maria pummeled the island as a powerful Category 4 storm in 2017, razing the electric grid. The outages also are blamed on a lack of maintenance and investment in its electric grid for decades.

What happened to Puerto Rico's electric grid before Hurricane Maria?

Even before Hurricane Maria, Puerto Rico's electric grid was well below utility reliability standards... was also allowed to deteriorate due to financial mismanagement, eventually resulting in a 10-billion-dollar bankruptcy in 2017, which today remains unresolved in arbitration.

When did Luma take over Puerto Rico's electric grid?

On the state of ongoing challenges: "LUMA took over as the transmission and distribution operator of Puerto Rico's electric grid in June 2021, only four years following the devastating impacts of Hurricane Maria.

The second initiative is the Smart Meter Initiative to replace all 1.5 million electric meters across Puerto Rico with new technology that will help detect outages faster, enable a more timely response when they occur and improve customer service.
