

Is Tajikistan a good country for hydropower?

Although Tajikistan is ranked eighth in the world for hydropower potential with an estimate of 527 terawatt-hours (TWh), the country's current hydro potential is only exploited at approximately 4%. The challenge to successful economic management is Tajikistan's high vulnerability to climate change and natural disasters.

Does Tajikistan have a good energy infrastructure?

While Tajikistan has been successful in providing universal access to electricity, the existing systems of its energy infrastructure function inefficiently. The large majority of hydro plants were built in the Soviet era and are ageing and require rehabilitation.

Does Tajikistan have emergency oil stocks?

As a net oil importer, Tajikistan is highly exposed to oil supply disruptions. It does not appear to hold emergency oil stocks or related reporting mechanisms at present and would greatly benefit from building stocks to counter potential supply disruptions.

What are the energy policy priorities in Tajikistan?

Energy policy priorities in Tajikistan are aimed primarily at alleviating annual winter shortages and providing the population with uninterrupted access to energy. The country's approach to its energy crisis has been variable, depending on the political situation and relationships with its neighbours.

However, Tajikistan's energy sector is prone to supply shocks. Energy policy focuses on providing uninterrupted energy access to all users while improving region. Hydropower is the main source of energy in Tajikistan, followed by imported oil, gas and coal. However, Tajikistan's energy sector is prone to supply shocks.
