

How does Mexico's energy reform affect the private sector?

As a result of Mexico's 2013 energy reform, the private sector is able to compete with PEMEX or enter into competitive contracts, joint ventures, profit sharing agreements, and license contracts with PEMEX for hydrocarbon exploration and extraction.

Is Mexico a member of EITI?

In October 2017, Mexico became the 53rd member of the Extractive Industries Transparency Initiative (EITI). Mexico remains an EITI member but on a suspended status based on its last validation of 2022. Department of State Department of the Treasury Department of Labor Comply Chain .

Is Mexico underinvesting in energy projects?

The few major projects that the government has actively invested in, including the Dos Bocas refinery, Mayan Train, and outer Mexico City airport, are unlikely to make up for underinvestment in nearly all other sectors. In the key area of energy, Mexico is unlikely to correct course quickly.

How much oil does Mexico produce a day?

In 2022, Mexico's oil production was nearly 2 million barrels per day (b/d), similar to levels since 2019. As of the March 2023 Short-Term Energy Outlook, we forecast that Mexico's petroleum and other liquids production will average 1.93 million b/d in 2023 and 1.91 million b/d in 2024.

Where does Mexico get its energy from?

Mexico sources most of its energy imports from the United States. U.S. natural gas pipeline exports to Mexico have increased more than 400% since 2011 (Figure 8). U.S. natural gas exports via pipeline totaled 2.1 trillion cubic feet (Tcf) in 2022 (Table 4).

Is Mexico a good place to invest in energy?

In the key area of energy, Mexico is unlikely to correct course quickly. Its oil production is stagnant, refining remains a losing bet, and electricity production is already at capacity and insufficient for continued business expansion in 2024 and beyond.

This report provides an assessment of Mexico's clean energy resource potential and pathways for rapidly deploying renewable energy technologies to enable Mexico to reach its goal of 35% renewable energy by 2024 within the current legal and regulatory framework.

The implementation of the Energy Reform Mexico is forecast to lead to an increase of over 46% in greenhouse gas emissions. Rating agencies have warned about the possibility of lowering Mexico's rating in 2022 due to the magnitude of government support received by Petróleos Mexicanos (PEMEX) and the Federal Electricity Commission (CFE), which ...
