Board of Directors. Mark Cironi Mark Cironi has over 30 years of experience in corporate management, sales management, and project management. Throughout his career he has sold, managed and implemented technology in the information technology industry with IBM, Oracle and Digital Equipment Corporation.

Installation Process. Green Energy Technologies" goal is to provide a quality experience through all phases of the installation process - from initial site analysis to turbine commissioning.

Wind sphere Overview. The Wind Sphere(TM) relies on its "wind tunnel" effect known in physics as the Bernoulli Principle. While the rest of the wind industry generates energy through the use of free-stream wind, the Wind Sphere(TM) captures and amplifies the wind, which produces more kilowatt-hours (kWh).

Federal Incentives in the United States: Federal Tax Credit (IRS Form 3468) The American Recovery and Reinvestment Act of 20092012 allows owners of small wind systems with 100 kilowatts (kW) of capacity and less receive an uncapped investment wind energy tax credit for 30% of the total installed cost of the system.

Technical Data Wind Sphere 35kw(TM) Operating Data: Rated Power - 35 kW; Cut-in wind speed - 7 mph; Rated wind speed - 26.8 mph; Generator type - Permanent magnet Direct Drive; Rated voltage - 480 volts; Rated current - ...

The Wind sphere & LEED How much does the Wind Sphere contribute to LEED Certification? According to the Leadership in Energy and Environmental Design (or LEED) scoring system, a developer would receive the following points for on-site renewable generation (Energy & Atmosphere Category), expressed as a percentage of building's annual energy offset in total ...

Applications. Through on-site generation and net metering, the Wind Sphere allows customers to immediately offset all or part of their electric usage and take advantage of wind energy as a viable source of power.

How It Works. As the wind blows, the Wind Sphere orients itself into the wind via an electromechanical yaw system. The shroud then catches the wind, forcing it through the turbine. The turbine generator is connected directly to your ...
