

Does Mexico have solar power?

Solar power in Mexico has the potential to produce vast amounts of energy. 70% of the country has an insolation of greater than 4.5 kWh/m<sup>2</sup>/day. Using 15% efficient photovoltaics, a square 25 km (16 mi) on each side in the state of Chihuahua or the Sonoran Desert (0.01% of Mexico) could supply all of Mexico's electricity.

Is Mexico a good place for solar energy?

The Renewable Energy Foresight 2011-2025 published by the International Renewable Energy Agency (IRENA) classifies Mexico as one of the best regions in the world for solar energy applications due to its geographical location between the latitudes of 14° and 33° in North-America.

Can a photovoltaic system supply all of Mexico's electricity?

Using 15% efficient photovoltaics, a square 25 km (16 mi) on each side in the state of Chihuahua or the Sonoran Desert (0.01% of Mexico) could supply all of Mexico's electricity. Installed Capacity of total distributed clean energy in Mexico.

Is solar PV a viable energy source in Mexico?

Solar PV was successful in both, securing 1,691 MW of the 2,085 MW auctioned in the first and 1573 MW of 3473 MW in the second auction. In 2013, 22% of the installed electricity generation capacity in Mexico was from renewable sources. The majority, 18.1% coming from hydroelectricity, 2.5% from wind power and 0.1% from solar PV.

What are the applications of solar energy in Mexico?

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost.

Why is photovoltaic energy a problem in Mexico?

This added 160 thousand households and small businesses to the matrix. In contrast, 80% of Mexican households are somewhat subsidized to pay less than 72% of the real cost of electricity, making it unattractive and unfeasible to invest in photovoltaic arrays for cleaner energy consumption.
