

Does Mexico have solar power?

Solar power in Mexico has the potential to produce vast amounts of energy. 70% of the country has an insolation of greater than 4.5 kWh/m²/day. Using 15% efficient photovoltaics, a square 25 km (16 mi) on each side in the state of Chihuahua or the Sonoran Desert (0.01% of Mexico) could supply all of Mexico's electricity.

Is solar energy a good investment in Mexico?

Solar resources in Mexico are among the best in the world, with annual daily solar irradiance levels ranging between 4.4 kWh/m² and 6.3 kWh/m². With the country's solar capacity reaching 10GW at the end of 2021, we expect solar energy to continue to present attractive opportunities for project developers and industrial consumers.

What are the applications of solar energy in Mexico?

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost.

What is distributed solar energy in Mexico?

Distributed energy in Mexico is classified as any system with a capacity below 500 kW. The National Association of Solar Energy (ANES from the Spanish acronym) reported approximately 21,600 interconnection permits for distributed solar in 2015.

Will Mexico's solar power capacity be driven by solar plant projects?

The development of Mexico's utility-scale solar power capacity is predicted to be driven mainly by solar plant projects. The government of Mexico proposed a new solar project that could be recognized as the largest PV plant in Latin America and top 8 of the world's largest solar plant once completed.

What is the Mexican Center for innovation in solar energy (cemie-Sol)?

One of the key partners in terms of innovation and technology transfer is the Mexican Center for Innovation in Solar Energy (CeMIE-Sol), a network of academic and private institutions. GIZ advises CeMIE-Sol's scientific committee and supports strategic projects in collaboration with enterprises and research institutions in both Mexico and Germany.

The Solar Bond program aims to empower citizens and transform them from passive consumers of electricity to clean electricity generators, as well as draw back the 11 million households currently in energy poverty indexes. Mexico ...
